Usable items / All soft touch spoons, all flex silicone spoons, weaning cleaner spoons, all silicone cleaner spoons, silicone cooking spoons  
Heat resistant temperature 110°C

Made in Japan

### ⚠ Precautions for silicone spoons

- Do not use in a microwave oven.
- If the silicone is strongly bitten or pulled, it may be damaged or cut. For those with a particularly strong biting force, these products should not be used as the silicone may be bitten off and swallowed.
- As this product is for home use, it is recommended to wash by hand. Use of dishwashers or sterilization storage at facilities may accelerate deterioration. It is recommended to replace promptly within a three month limit.

**NEW**

This plate's solid silicon construction is dishwasher and microwave safe. Never worry about the plate breaking, even if you drop it!

Yellow

Red

Blue

The bottom features a suction pad to keep it securely in place.

※Depending on the surface of the table suction power may not be demonstrated.

Material / Silicone rubber  
Heat resistant temperature 200°C Cold resistant temperature -20°C

Made in Korea

**Ideal for fluorine coated frying pans. Soft silicon rubber is suitable for cooking.**

This silicon rubber spatula spoon is heat resistant and perfect for mixing, combining, and scooping. Constructed from silicon rubber, nylon resin, and a metal core, this spatula spoon holds its shape even under strenuous use. It can also be used in place of a regular spatula for confectionery use.

Heat resistant temperature 200°C Cold resistant temperature -20°C Made in Japan

A turner spoon made of silicone rubber that is heat resistant and can also mix, scrape and scoop.

In addition to silicone rubber and nylon resin, a metallic core is incorporated for a structure that is hard to twist even when force is applied. Use for cake making instead of a spatula.
